MAPS GROUP CHOSEN BY EUROCOMMERCIAL FOR MONITORING CONSUMPTION IN ALL OF ITS ITALIAN SHOPPING CENTERS

Parma, 11 December 2023

Maps Group, in partnership with its subsidiary Energenius S.r.l., has been selected for the implementation of a monitoring system across all Italian shopping centers owned by Eurocommercial, a significant real estate investment company listed on various Euronext markets including Euronext Milan, and one of the leading specialists in European shopping centers.

The project involves expanding the existing monitoring system, previously installed by Energenius, to enable **real-time monitoring** of **electricity consumption** in all common areas and commercial activities within the centers. The system will also track **gas, water, air conditioning, lighting** consumption, and **waste production** in common areas, while keeping track of energy production and usage generated by **photovoltaic systems** in certain centers, along with calculating the produced **CO2 emissions**.

Through the **control dashboard**, Eurocommercial's central management will be able to monitor specific Key Performance Indicators (KPIs) generated by the system in real time, facilitating **comparisons** between the consumption of **centers of different sizes** and analyzing machine operations (such as air conditioners, air barriers, etc.) to **optimize maintenance activities**.

With the assistance of this monitoring platform, Eurocommercial aims to achieve **sustainability certifications** such as the BREEAM protocol for its buildings.

Marco Ciscato, Chairman of Maps Group: *'Eurocommercial's decision to adopt our real-time monitoring system for their shopping centers highlights the importance of efficient and centralized software in consumption control. This has become crucial for any organization that wants to optimize the energy efficiency and environmental sustainability of their facilities. The system not only tracks energy and resource consumption instantly but also provides detailed KPIs and tools to enhance maintenance practices and achieve sustainability certifications.'*

MAPS GROUP

Founded in 2002, Maps is an Innovative SME and now heads a group, Maps Group, comprising the following companies: Artexe, Energenius, I-Tel, Iasi, SCS Computers. Listed on Euronext Growth Milan of the Italian Stock Exchange, Maps Group is headquartered in Parma and counts approximately 300 employees. It operates in the digital transformation sector, specifically in three markets: Healthcare, Energy and ESG, designing and distributing proprietary solutions for the analysis of big data that allows client companies to manage and analyse large quantities of data and information, helping them make strategic and operational decisions and define new business models.

The Maps Energy business unit supports the changes taking place for the energy transition, first and foremost those of flexibility, efficiency, and Energy Communities.
